PROFILE

Just a guy with a strong commitment to the opportunities given by life. Dedicated, passionate and fully immersed into the world of tech. Planning to build things which contribute to the society in every corner of the globe in every aspect of life. Ready to tackle the challenges head-on, adaptable to everything everyone all at once. Currently concentrating in Software Engineering Major at Mae Fah Luang, University of Thailand, in order to build up my knowledge.

WORK EXPERIENCE

Brilliance Non-profit Organization

Graphic Designer & Video Editor

2023 : 2025

- Created attractive, persuasive and clean posters, announcements, and educational graphics.
- Made many podcast videos about everyday needs and health-care risks.
- Successfully collaborated with members from distinct departments.

Doing More With Less

Content Writer & Software Developer

Jan, 2025 : Present

- Produced contents related to environment and mother nature with simple terms and intriguing facts.
- Translated contents written in English to Burmese without it undermining the original meaning.
- Actively participated in workshops and filled in the roles that needed to be.
- Built and maintained a website for both volunteers and readers to deliver more contents effectively.

ADDITIONALS

- Participated in a event that is mainly python focused camp to explore diverse knowledge, held by Elysium.
- Completed Python Programming Course provided by Simbolo, one of the famous tech organizations.
- Got into an OJT list provided by Code Lab Organization.
- Enthusiastically attended an AI workshop held by American Center Yangon, and created a bot that returns everything professional about me.
